metry, Trigonometry, Astronomy, Mental Philoso-	
phy, Chemistry, and Geology, per annum, . . . .	\$40 00
Composition and Declamation are attended to once a week.	

In addition to the above rates, each pupil is charged 50 cents, per session, for contingent expenses connected with the School rooms.

## TEXT BOOKS.

These will be furnished, at Columbia prices, to all who desire them.

## APPARATUS, Etc.

There is connected with the Institution an extensive apparatus, together with a handsome cabinet of minerals and curiosities, adapted to illustrate the various subjects in Chemistry, Natural Philosophy, Geology, Mineralogy, and Natural History.

### LIBRARY.

The Library, though small, is well selected, and furnishes valuable information to the students on almost every subject.

### LITERARY SOCIETY.

The Adelpian Debating Society is a voluntary association, which is kept up with great spirit and good order by the students, contributing greatly to their moral and intellectual improvement.

### AMUSEMENTS.

The introduction of gymnastic exercises, during the present year, has contributed greatly to the health and bodily vigor of the pupils.

### GOVERNMENT.

The leading aim of the Principal has been to secure the affections of the pupils, and teach them self-respect; and, by these means, to induce them to govern themselves. Where points of honor are involved, it has been found of great service, at times, to allow the parties a trial by a court of their fellow-students; subject always, however, to the judgment of the Principal.

### RELIGIOUS WORSHIP.

Pupils are all required to attend public worship on the Sabbath; together with Sabbath-school or Bible-class exercises, either in the chapel, or at some other place designated by their parents or guardians; as also daily morning and evening prayers in the Institution.

### BOARDING.

The Principal can accommodate *eighteen* or twenty boarders, allowing only two to a room. Excellent board can also be had

in a number of genteel and pious families in the village, where every attention will be paid to the morals and deportment of those entrusted to their care. The usual price of board is \$9 per month, not including washing, wood, or lights. These three last items, with economy, will not cost over two dollars, or two and a-half per month.

### TERMS, SESSIONS, AND VACATIONS.

The year will consist of ten months, divided into two sessions. The Spring session commencing on the second Monday in January, and closing on the last Friday in July. The Fall session commencing on the first Monday in October, and closing on Friday before Christmas. Tuition by the session to be paid in advance. *Candidates for the ministry receive their tuition free.*

### LOCATION.

Greenwood is conceded by every one to be, not only one of the healthiest, but one of the loveliest rural villages in the up-country; affording all the advantages of refined society, and, at the same time, free from the confusion and vice of a Court House village. Situated on the Greenville and Columbia Railroad, it is accessible from all parts of the State. Parents having families to educate would act wisely to locate in Greenwood, at least until this most important end should be accomplished.

### EXPENDITURES.

Pupils are expressly prohibited from contracting any debt, in stores or elsewhere. Monies deposited with the Principal for the use of a child or ward, will be faithfully and economically applied, and strictly accounted for.

## NOTICE.

EVERY friend, to whom this catalogue is sent, is requested, as he values a thorough education, combined with moral and religious training, to use his efforts to send us at least one *good lad, or young man, whose moral character and studious habits he can vouch for*. We wish, by separating the precious from the vile, to show to the world what can be accomplished by a well-directed education, unfettered by the shackles of vice. We should like to hear from our friends, definitely, in regard to this matter, early in December, as we wish, if necessary, to provide another assistant before all competent ones shall have made their arrangements for the ensuing year. We are resolved to employ none but such as are fully competent. Our present assistant, MR. SIMONDS, is not only an accurate mathematician, but he also brings to his department a mind well stored with general information, the fruit of extensive travel and close observation.

All communications relating to the School, to be addressed to the Principal,

REV. S. DONNELLY,  
*Greenwood, S. C.*
